

pgAdmin Overview

At the top most layer (select Servers), on the top right bar, under Dashboard, you can see some quick links and some info on getting started.

To edit preferences, go to File - Preferences.

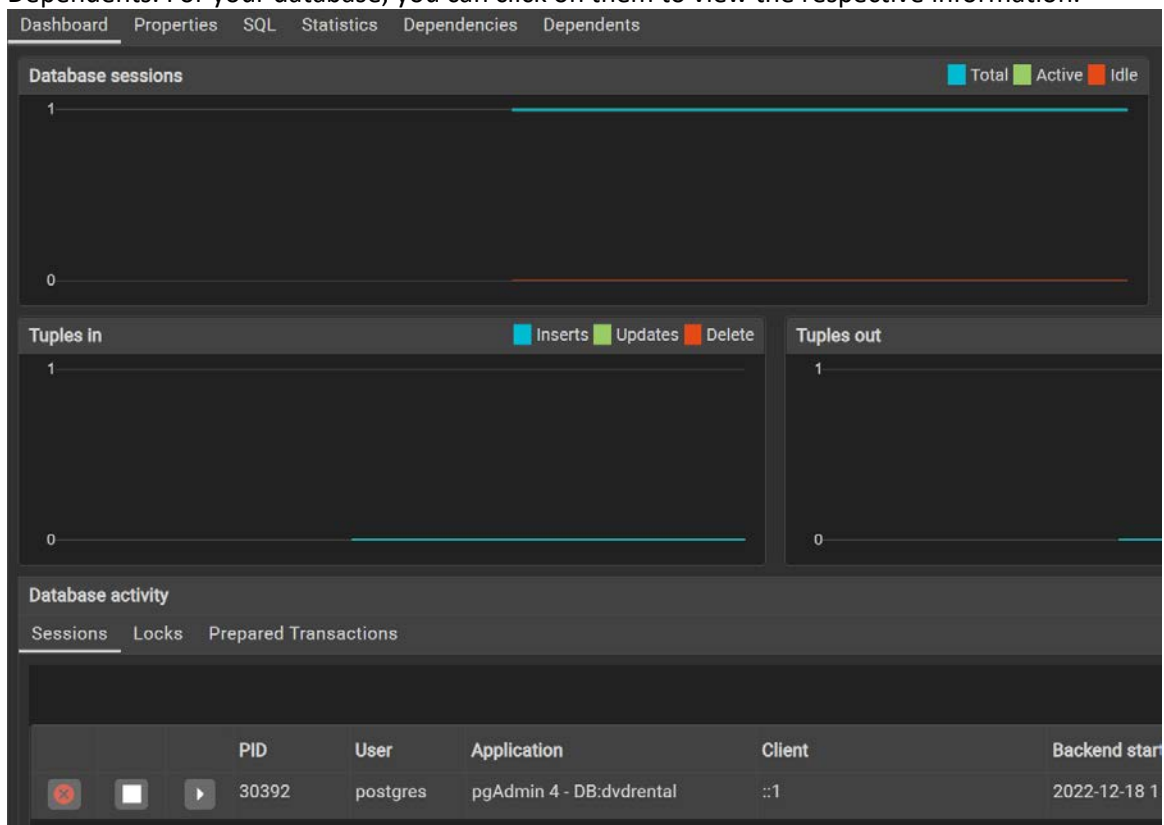

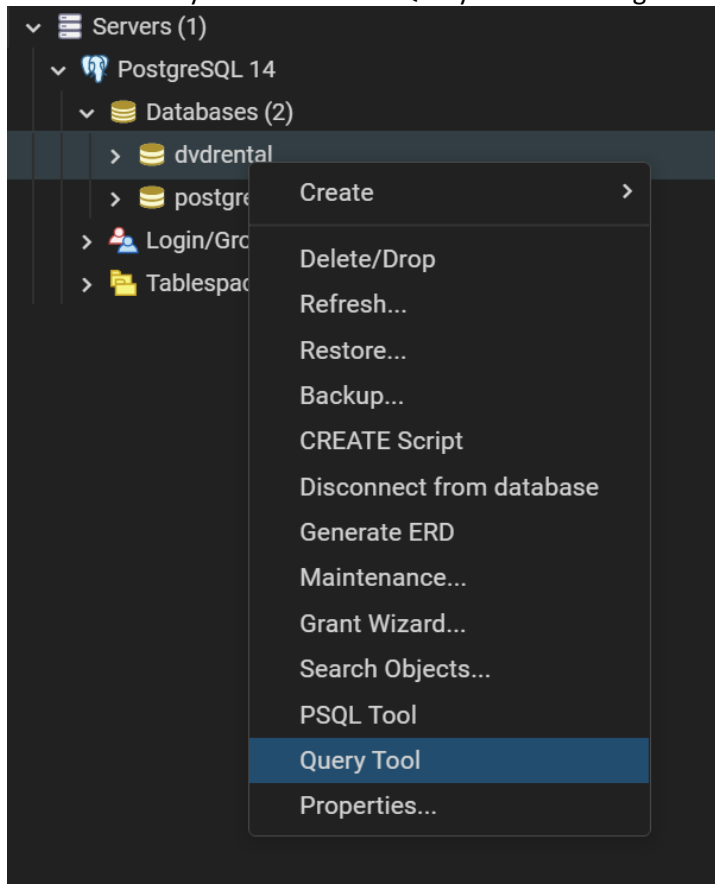

Suggestions on preferences:

- Under Miscellaneous - Themes, there is option for dark theme
- Under Query Tool - Editor, there is option to adjust font size. Default is 1 em. Can set a bigger number to scale accordingly e.g. 1.4

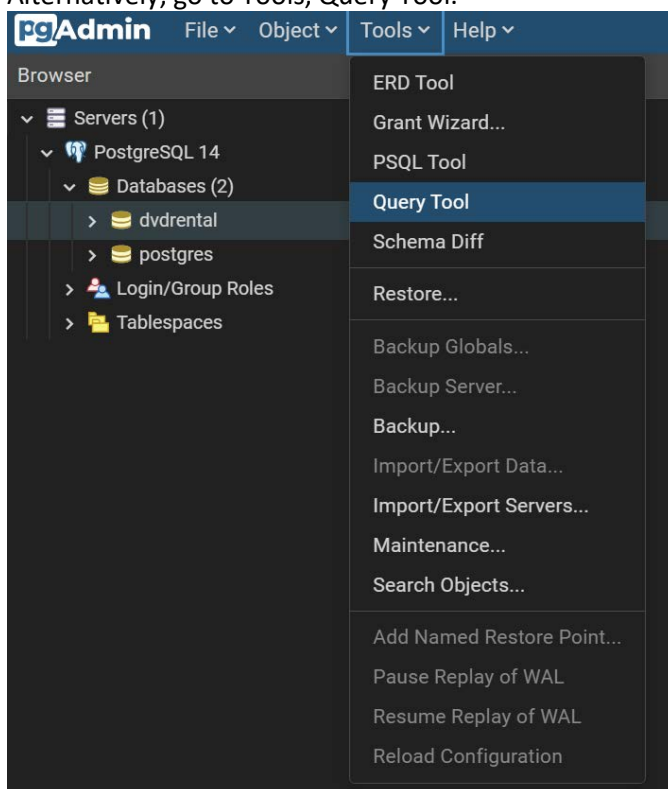

There are various windows, including Dashboard, Properties, SQL, Statistics, Dependencies, Dependents. For your database, you can click on them to view the respective information.

Most commonly used tool is the Query Editor. Just right click on any database to select it.

Alternatively, go to Tools, Query Tool.

There is also the Notifications window, which shows notifications if any.

Under Data output, can click the Download button to download the output as CSV file.

2	384	Grosse Wonderful	A Epic Dra...
3	8	Airport Pollock	A Epic Tale ...

You can drag it out and back as a separate tab.

The screenshot shows the pgAdmin interface with a query window and a data output window. The query window displays the query `SELECT * FROM film;` and the data output window shows the results of the query. The data output window has tabs for Data output, Messages, and Notifications. The Data output tab is active, showing a table with 11 columns: film_id, title, description, release_year, language_id, rental_duration, rental_rate, length, replacement_cost, rating, and last_update. The table contains 1000 rows of data.
